

## **EOL Announcement**

### **End Of Life Notification for PowerDsine's Power over Ethernet 6001 Midspan Model**

April 29<sup>th</sup>, 2005

PowerDsine is announcing that it will discontinue the manufacturing of its popular 6001, one port Midspan model. Last time orders for this product will be accepted up until **May 15, 2005**, with the last date of shipment being **June 30, 2005**.

#### **Migration Strategy**

PowerDsine is offering its 3001, one port model, as a replacement for the PowerDsine 6001 model. The 3001 model offers the same functionality as the 6001 model, however, it comes in a more compact design (*half the size of the 6001 model*), and at a significantly lower price. The 3001 is fully compliant with the IEEE 802.3af standard, in addition, it supports legacy terminals as well as Cisco powered devices. The 3001 offers a unique interlocking feature to connect multiple units. The 3001 is ideally tailored for WLAN access point installations, IP Camera installations and VOIP installations.

The notice does not affect the PowerDsine 6006/6012/6012 Midspan products.
